

## Training

Our purpose is to offer an **ADVANCED TRAINING COURSE** for Hull & Machinery and P&I to the Surveyors who are already acting in the marine insurance claims.

Our six days intensive course will be in English language and performed by our **GIMS** senior Lecturers, having over 30 years experience in the marine casualties as surveyors, naval architects, shipyard managers and class surveyors.

Question time and videos will be valid support for Participants.

A particular attention is concentrated in the main cause research, specially in the engines breakdown, repairs and claim risk assessments.

This our **ADVANCED TRAINING COURSE** will take place in various locations of West Africa, Far East, South America and later on will be offered worldwide.
